## Results

Proof of the Main Theorem

Fuklid

Theorem

There is no largest prime number.

The proof uses reductio ad absurdum.

## Proof.

- 1. Suppose *p* were the largest prime number.
- 2. Let *q* be the product of the first *p* numbers
- 3. Then q + 1 is not divisible by any of them.
- 4. Thus q + 1 is also prime and greater than p.
