#### Results

Proof of the Main Theorem

## There Is No Largest Prime Number

The proof uses reductio ad absurdum.

## **Theorem**

There is no largest prime number.

## Proof.

- 1. Suppose *p* were the largest prime number.
- 2. Let q be the product of the first p numbers
- 3. Then q + 1 is not divisible by any of them.
- 4. Thus q + 1 is also prime and greater than p.
